February 20, 1964

MEMORANDUM TO: J. Lee Rankin Oswald Item in Post-Session Period

FROM: Howard P. Willens

Attached are some investigative materials which Mr. Dulles stated he found in the file maintained by the State Department. They include three (3) FBI reports and Oswald's application for review of his discharge before the Navy Discharge Review Board, which we have recently requested of the Department of Defense.

The first two FBI reports, i.e., those dated May 12, 1960 and October 25, 1963, were never submitted to the Commission.

Most of the information contained in the 1963 report, dealing with Oswald's Cuban activity in New Orleans was supplied in other FBI reports. Some, but not all, of the information contained in the May 12, 1960 report was also summarized in other FBI reports which have been submitted to the Commission.

I discussed this informally today with Mr. Malley of the FBI. Mr. Malley confirmed that these reports probably were not made available because of the different headings carried by these reports. I suggested to him that the May 12, 1960 report appeared particularly significant in that it suggested that the initial FBI investigative activities were precipitated by the information that Marguerite Oswald purchased a check in January of 1960 in order to send $25 to her son in Moscow. Mr. Malley took down the headings of these reports and said that he would check back with us.

Mr. Malley called later and stated that he was informed that the information set forth in these reports had been supplied the Commission in other reports. He stated that the Bureau would be glad to send these reports officially if we so desired. He stated that he believed that no other reports carrying such titles did exist which had not been supplied the Commission.

As a matter of information, he also stated that the USSR opposed a ban on Cuba as a result of the numerous publicity references Cuba's collection to Russia. He suggested that this was reflective contrary to my suggestion earlier that Agee, with determination making the Cuba investigative effort by the CIA acceptable. He did state, however, that so far as he knew there were no investigative reports pertaining to Agee's travel prior to the report of May 10, 1960, nor was any other investigation contemplated prior to April of 1960.

I told Mr. Kelley that we would consider the matter further, but that in the absence of a request there was no need for the Bureau to terminate additionally those two reports which are already in the possession of the Commission.
